# Estimating Stitch Count Worksheet

Here is an easy way to estimate the number of stitches you'll need for great looking logos.

* Print out the grid below
* Cut out your artwork and place it over the grid
* Count the number of boxes it fills, then find that number in the chart
* If your design goes outside the grid, estimate the extra grid space you need and add it to your total.

| # of 1/4" BLOCKS | | STITCHES PER BLOCK |
